

June 6, 2018

To the ESC Team,

I'm writing to express my overwhelming satisfaction regarding the recent energy project you helped us complete. Obtaining new LED lighting, a chiller, air compressor and dryer as well as repairing some leak repairs has helped our facility run significantly more efficiently and cost effectively. The new lighting is making a big difference in our facility especially in our manufacturing plant as evidenced by our increased visual acuity to detect and correct immediate injection molding problems as they occur.

We are very happy to have been able to utilize the Eversource incentive program for our project! Jack Cunningham and Jamie Sykora were our main points of contact and were very knowledgeable, transparent and helpful. We had great experience working with ESC's team on our recent energy efficiency project and would hire your company again for future building needs!

Best Regards,

Susan
