Environmental Systems Corporation hires Jeff Garnelis as Safety / Risk Manager

Environmental Systems Corporation

WEST HARTFORD, Conn. – April 22, 2022 – Environmental Systems Corporation (ESC), a leading provider of building technology solutions throughout Connecticut, is pleased to announce that it has hired Jeff Garnelis as Safety / Risk Manager.

“There are a lot of things ESC has had to do as our company has grown over the past fifty years,” says chief operating officer Michael Mullin. “The safety and risk position is another example of this. At our size, it was important for us to bring in an experienced individual to improve our safety performance.”

As Safety/Risk Manager, Jeff will be tapping into his experience conducting claims analyses and determining loss trends to enhance ESC's overall safety program by promoting and maintaining a company-wide safety culture. Jeff will coordinate with human resources, operations, and other department managers to develop and roll out safety initiatives, policies, programs and training.

Prior to joining ESC, Jeff worked for Travelers Insurance as a Risk Control Consultant conducting claims analyses to determine loss trends while collaborating with clients to determine methods to limit future losses. He also worked for AIG Insurance as a Loss Prevention Associate where he was responsible for surveying energy and commercial facilities, focusing on fire safety and overall facility efficiency.

“We already knew and respected Jeff because he was the risk representative for our property and casualty insurance carrier, Travelers,” says Mullin. “We couldn’t be more excited that we were able to work this out and bring Jeff on-board. I believe we will look back at this as one of the most important changes ESC has made in their safety/risk effort in many, many years.”

Jeff’s main goal is to ensure everyone goes home safe at the end of the day, and looks forward to working with ESC to build on an already impressive culture.

“Safety excites me because we are constantly striving toward continuous improvement,” says Jeff. “Fifty years ago, we did not have nearly as many controls and tools as we have now. As a result, many people suffered preventable injuries. In a world where technology and knowledge are increasing at exponential rates, we can always find ways to be better.”

Jeff is a graduate of the University of Connecticut with degrees in Mechanical Engineering and Mathematics, and is also a Construction Risk and Insurance Specialist (CRIS). He grew up in Stafford, Connecticut, and spent several years working for his father’s residential homebuilding business.

About ESC

Established in 1972, ESC helps facility owners and managers enhance facility performance by planning and integrating intelligent building solutions to optimize comfort, security, life safety, energy efficiency and audio/visual technology. We have built a reputation as a leading-edge provider of state-of-the-art technology solutions with the highest level of customer service.
